Portfolio (HTML/CSS)

Objective: Build a fully responsive, static portfolio website using HTML5 and CSS3 to showcase your skills, projects, and professional identity as a developer.

Requirements Checklist:

1. Responsive Design (Mobile, Tablet, Desktop)
2. Navigation Bar (Links to sections)
3. Hero Section (Name, short bio, call-to-action)
4. About Me Section (Skills, education, interests)
5. Projects Section (At least 3 projects with descriptions)
    a. Placeholder projects are fine as well
6. Footer (Social links, copyright)
7. Styling (Consistent colors and fonts)
8. Optional: Contact Form
    a. Functionality not required

Learning Outcomes:

- Practice responsive design principles
- Master CSS positioning and layout techniques
- Structure content semantically for accessibility and SEO
- Prepare a professional portfolio for future job/internship applications.
